Associate ML Engineer with 2+ years' experience building scalable ML pipelines, cloud-native systems, and LLM-powered solutions. AWS and Terraform certified. Passionate about innovation, and building systems.

Education

Degree	Institute	Year	Percentage/CGPA
B.Tech. Chemical Engineering	Indian Institute of Technology, Roorkee	2022	8.375 CGPA
Class XII (CBSE)	Sadhu Vaswani International School, New Delhi	2018	98.2%
Class X (CBSE)	Sadhu Vaswani International School, New Delhi	2016	10 CGPA

Work Experience

- **Associate ML Engineer — JPMorganChase (Commercial Banking/Global Banking)** Bangalore, India
June 2022 - Present
 - Implemented a templated Batch Serving ML pipeline using AWS SageMaker, Step Functions, and custom Python libraries, processing 25Mn data points in under 2 hours - adopted as a standard pattern by 4+ teams.
 - Engineered statistical modules to quantify company data quality with a Likert scale confidence-metric, directly enabling risk-informed business decisions.
 - Authored the comprehensive low-level design (LLD) to integrate these modules into the existing data pipeline, optimizing efficiency and scalability to process 200Mn data points in 30mins on AWS EMR.
 - Implemented robust Python testing frameworks with 90%+ code coverage across project deliverables, ensuring functional reliability and enabling continuous deployment.
 - Built an LLM-powered engine using OpenAI APIs and custom prompt engineering techniques to analyze multi-modal business data for targeted marketing, winning recognition in company hackathon.
 - Regularly partnered with cross-functional teams including data engineering, infra, and business to drive project implementation and timely delivery.
 - Provided technical mentorship to 5+ interns contributing to successful project outcomes and PPO offers.
 - Earned a fast-track promotion to Associate (Software Engineer 2) within a year due to exemplary performance, technical leadership, and project delivery excellence.
- **Software Engineer Intern — JPMorganChase (Corporate and Investment Banking)** Remote
June 2021 - Aug 2021
 - Contributed to the high-priority frontend migration of a payments application, modernizing it from legacy Struts 1.x to ReactJS.
 - Implemented identity-based UI components for Transaction Processing and OS Check modules addressing complex business logic.
 - Received positive feedback for technical contributions and teamwork, resulting in a Pre-Placement Offer (PPO).
- **Founding Software Engineer — Explorin Academy** Remote
Oct 2021 - Feb 2022
 - Architected and developed the company's first website using ReactJS, establishing first digital presence.
 - Owned end-to-end product development of the "Onboarding Platform" from conception to deployment.
 - Crafted a multi-step onboarding system with user authentication, profile creation, skill assessment, and mentor session booking functionality.
 - Built the foundational backend architecture using Django REST Framework, including project structuring, API design, user management, and service logic for the Onboarding Platform.
 - Spearheaded brainstorming sessions with the founding team to define platform features, user flows, and technical roadmaps aligned with early business goals.

Technical Skills

- **Languages:** Python, SQL, HTML, CSS, Javascript, C++
- **Web Technologies:** Django, Django REST, Databricks, PySpark, ReactJS, Streamlit
- **Cloud Technologies:** AWS (SageMaker, EMR, Step Functions, Lambda, S3, API Gateway), Terraform, Docker
- **Cloud Certifications:** AWS Developer Associate (Oct 2023), Hashicorp Terraform Associate 003 (Sep 2023), AWS Certified Cloud Practitioner (Dec 2022)
- **Exposure to:** LLM, Prompt Engineering, OpenAI API, YouTube APIs, CI/CD, Kubernetes

Achievements

- Recognized at JPMC's Inventor Recognition Program for contribution towards IP through Patent Filing. (2024)
- Filed two technical patents with JPMC related to AI/ML engineering solutions. (2024)
- Recognized in JPMorganChase Software Engineer Program (SEP) Scroll for exceptional performance. (2023)
- Secured 10th place out of 1700 teams in JPMC's Annual Global Hackathon at the Bangalore Tech Center. (2023)
- Ranked among the top 1% of successful candidates nationwide in CBSE (2018).
- Ranked among the top 11% of successful candidates nationwide in Class 10th boards (2016).

Academic Project

- **Feature Engineering using Genetic Algorithm** *Jan 2022 – Jun 2022*
IEE-03, Artificial Neural Network and Application: Course Project, IIT Roorkee
 - Designed and implemented Genetic Algorithm for optimal feature selection in breast cancer detection models.
 - Engineered key GA components including population initialization, roulette wheel selection, two-point crossover, and mutation operators.
 - Optimized the MLP classifier by dynamically selecting the most informative features achieving enhanced F1-scores, significantly improving model performance.
 - Published technical findings in a Medium article that garnered 10.3K views and 5.6K reads.

Community Involvement and Leadership

- **Summer Internship Mentor — JP Morgan Chase:** Successfully conducted two summer internships for CB AI/ML team. Provided technical guidance, streamlined project deliverables resulting in successful project outcomes and Pre-Placement Offers. (2023, 2024)
- **Participant — Great Indian Developer Summit:** Attended sessions on emerging AI technologies and networked with people across multiple domains. (2023, 2024)
- **Technical Member — Force for Good, JPMorganChase:** Worked with Bangalore Food Bank to streamline their operations by designing and implementing a workflow on Zoho. Automated manual processes, enhancing efficiency and reducing operational overhead for food distribution and tracking. (November 2023)
- **Additional Secretary — Kshitij - The Literary Magazine, IIT Roorkee:** Facilitated smooth functioning of the group by ensuring coordination between various verticals. Conducted online literary events to improve student engagement and enhance digital presence. (Dec 2020 - Jul 2021)
- **Volunteer Open Source Contributor — OpenTimelineIO:** Contributed to the Java-Bindings repository of the OpenTimelineIO project. PR's merged: #41, #27, #23. (April 2022)
- **Software Engineering Mentor — Explorin:** Introduced 15+ freshers and sophomores from across the country to the field of software development. Undertook weekly doubt-solving sessions to accelerate learning and inculcate interpersonal skills. (March 2021)
